Flo / LoFlo
Light cured
flowable composite

GC Gradia Direct Flo & Lo Flo / GC UniFil Flow Light cured flowable composite

1. Marginal adaptation of five flowable resin composites in the dentin cavity; Y. Utsumi, T. Hasegawa, K. Itoh, H. Hisamitsu; Abstract 1155 – 80th General Session of the IADR, 2002, San Diego, USA
2. Flexural modulus of commercially available flowable composite resin materials; L.C. Ramp, M.H. Ramp, J.C. Broome; Abstract 0374 – 81st General Session of the IADR, 2003, Göteborg, Sweden
3. The adhesion between fiber posts and composite resin cores: microtensile bond strength of different combinations of materials; C. Goracci, F. Monticelli, A.U. Tavares, F. Sadek, P.E.C. Cardoso, M. Ferrari; Abstract 1268 – 81st General Session of the IADR, 2003, Göteborg, Sweden
4. Scanning electron microscopic evaluation of fiber post-resin core unit; F. Monticelli, C. Goracci, S. Grandini, E. Bertelli, P. Balleri, M. Ferrari; Abstract 1953 - 81st General Session of the IADR, 2003, Göteborg, Sweden
5. Comparison of the acid-resistance level of the dentine surface immersed with fluoride-releasing materials in artificial saliva; T. Noguchi, S. Kato, S. Akahane; Abstract 1986 - 81st General Session of the IADR, 2003, Göteborg, Sweden
6. Translucency of flowable resin composites by contrast ratio; T. Katayama, S. Iwasaki, M. Miyamoto, S. Ishihara, S. Yokose; Abstract 2007 - 81st General Session of the IADR, 2003, Göteborg, Sweden
7. Wear resistance of flowable composites; Y. Tani, A. Ishikawa, K. Amate, J. Ishida; Abstract 2697 - 81st General Session of the IADR, 2003, Göteborg, Sweden
8. GC UniFil Flow – rating; The Dental Advisor, Vol.20, No.7, September 2003
9. Effect of delayed polishing on gap formation in flowable composites; M. Irie and K. Suzuki; Abstract 3131 – 82nd General Session of the IADR, 2004, Honolulu, Hawaii.
10. Flexural strength and modulus of interface between composite and RMGI; M.L. Cannon and R. Jurado; Abstract 3128 - 82nd General Session of the IADR, 2004, Honolulu, Hawaii.
11. Scanning electron microscopic evaluation of fiber post-resin core units built up with different resin composites. F. Monticelli, C. Goracci, S. Grandini, F. Garcia-Godoy, M. Ferrari. American Journal of Dentistry, Vol.18, No.1, February 2005
12. Microleakage of conservative flowable composite restorations in posterior teeth. E.D. Bonilla, R.G. Stevenson, A.A. Caputo and S.N. White. Abstract 2997 - IADR, March 2005, Baltimore, Maryland, USA *
13. Translucency of flowable resin composites by contrast ratio. T. Katayama, M. Miyamoto, S. Iwasaki, S. Ishihara and S. Yokose. Abstract 3113 - IADR, March 2005, Baltimore, Maryland, USA *
14. Microtensile bond strength to ground enamel by glass-ionomers, resin-modified glass-ionomers, and resin composites used as pit and fissure sealants. F. Papacchini, C. Goracci, F. Tranchesi Sadek, F. Monticelli, F. Garcia-Godoy, M. Ferrari. Journal of Dentistry (2005) 33, 459-467 *
15. Twenty-four hour flexural and shear bond strengths of flowable light-cured composites: a comparison analysis using Weibull statistics. R. Tjandrawinata, M. Irie, K. Suzuki. Dental Materials Journal 26(4): 589-597, 2007

16. Marginal adaptation and performance of bioactive dental restorative materials in deciduous and young permanent teeth. E. Gjorgievska, J.W. Nicholson, S. Iljovska, I.J. Slipper. *J Appl Oral Sci.* 2008; 16(1): 1-6
17. Effect of intermediate agents and pre-heating of repairing resin on composite-repair bonds. F. Papacchini, E. Magni, I. Radovic, C. Mazzitelli, F. Monticelli, C. Goracci, A. Polimeni, M. Ferrari. *Operative Dentistry*, 2007, 32-4, 363-371
18. Polishing effect on surface properties and stainability of flowable composites. E. Tsubaki, N. Inai, A. Fujishima, T. Miyazaki, M. Otsuki and J. Tagami. Abstract 0127 - IADR 2007, New Orleans, USA
19. The effect of intermediate agents in composite repair bond strength. F. Papacchini, I. Radovic, E. Magni, F. Monticelli, C. Goracci, N. Chieffi and M. FERRARI, University of Siena, Italy, University of Belgrade, University of Siena, Serbia and Montenegro. Abstract 0308 – IADR, 2006, Dublin, Ireland.
20. Effect of whitening on microleakage and color stability of composites. K. Kobayashi, K. McKenzie, H. Malmstrom and Y.-F. Ren. Abstract 0411 – IADR, 2008, Toronto, Canada.
21. Bond Strength of Repaired Filling Materials Using Different Repair Procedures. F. Salama. Abstract 3134 – IADR, 2008, Toronto, Canada.
22. Flowable composites as intermediate agents without adhesive application in resin composite repair. F. Papacchini, I. Radovic, E. Magni, C. Goracci, F. Monticelli, N. Chieffi, A. Polimeni and M. Ferrari. *American Journal of Dentistry*, February 2008, Vol 21, nr 1
23. Influence of irradiation time on volumetric shrinkage and flexural properties of flowable resins. S. Uyama, A. Irokawa, M. Iwasa, M. Tonegawa, Y. Shibuya, K. Tsubota, T. Takamizawa and M. Miyazaki. *Dental Materials Journal* 26(6): 892-897, 2007
24. Influence of composite resin on bond strength of all-in-one adhesives. C. Goracci, M. Mergvelashvili, M. Sedda, E. Magni and M. Ferrari. Abstract 2966 – IADR 2009 Miami, USA
25. Polymerization Shrinkage and Flexural Modulus of New Flowable Composites. A. NAPOLES, USAF, Minot AFB, ND, and K. VANDEWALLE. Abstract 3268 – IADR 2009 Miami, USA
26. Adhesion of streptococcus mutans to different restorative materials. C. Poggio, C.R. Arcialo, F. Rosti, A. Scribante, E. Saino, L. Visai. *The International Journal of Artificial Organs*. Vol. 32, n°9, 2009
27. Bond strength performance of different resin composites used as core materials around fiber posts. F. Tranchesi Sadek, F. Monticelli, C. Goracci, F.R. Tay, P.E.C. Cardoso, M. Ferrari. *Dental Materials* 23 (2007) 95-99
28. Hydrolytic stability of composite repair bond. F. Papacchini, M. Toledano, F. Monticelli, R. Osorio, I Radovic, A. Polimeni, F. García-Godoy, M. Ferrari. *Eur J Oral Sci* 2007 ; 115 : 417-424
29. Stress distributions in adhesively cemented ceramic and resin-composite Class II inlay restorations: a 3D-FEA study. P. Ausiello, S. Rengo, C.L. Davidson, D.C. Watts. *Dental Materials* (2004) 20, 862-872
30. Post-surface conditioning improves interfacial adhesion in post/core restorations. F. Monticelli, M. Toledano, F.R. Tay, A.H. Cury, C. Goracci, M. Ferrari. *Dental Materials* (2006) 22, 602-609
31. Three-year clinical evaluation of two flowable composites. J.R. Gallo, J.O. Burgess, A.H. Ripps, R.S. Walker, M.B. Maltezos, D.E. Mercante, J.M. Davidson. *Quintessence International*, Volume 41, Number 6, June 2010
32. Microleakage and SEM of Class-I restored with Vertise self-adhering composite. C. Goracci, A. Vichi, M. Margvelashvili and M. Ferrari. Abstract 15 – IADR 2010, Barcelona, Spain

33. An evaluation of biaxial-flexural strength of flowable composites. D. Thome, J. Rothrock, P. Hardigan, J. Larumbe and C. Garcia-Godoy. Abstract 2293 – IADR 2010, Barcelona, Spain
34. SEM and microleakage evaluation of the marginal integrity of two types of class V restorations with or without the use of a light-curable coating material and of polishing. E. Magni, L. Zhang, R. Hickel, M. Bossù, A. Polimeni, M. Ferrari. Journal of dentistry 36(2008) 885–891
